portfolio-inky-three-33.vercel.app | github.com/serinenadabenmissi-design

CAREER SUMMARY:

Full Stack Developer and AI Engineer with a Bac+3 in Computer Science. Specialized in Python, Django, and Deep Learning. Proficient in React, JavaScript, and algorithms. Experienced in Node.js, Vue.js, PHP, and MySQL. Rapidly adopts new technologies mastered PHP and MySQL in 3 weeks for a university e-commerce project built AI Nutri with Django back-end and integrated Deep Learning. Seeking to apply my full stack and AI expertise within an agile team.

RELEVANT EXPERIENCE:

AI NUTRITIONIST — Full Stack AI Application (May 2026)

ai-nutritionist-lsha.onrender.com

github.com/serinenadabenmissidesign/AI_nutritionist.git

- Built full-stack nutrition app with Django back-end and YOLOv8-seg for intelligent food photo analysis
- Developed front-end with HTML, CSS, JavaScript
- Designed RESTful APIs and SQLite3 database architecture
- Trained and deployed YOLOv8-seg (instance segmentation model) for food item segmentation and calorie estimation using Python

FAKE NEWS DETECTION — ML/NLP Project (August 2025)

- github.com/serinenadabenmissi-design/machine-learning-fake-news-detection.git
- Built machine learning model to classify news articles into 7 categories (bias, bs, conspiracy, fake, hate, junksci, satire, state)
- Used TF-IDF vectorization (5,000 features, n-gram range 1-2) with NLTK text preprocessing (stopword removal, lemmatization)
- Achieved ~87% accuracy on Kaggle Fake News dataset (~12,273 articles)
- Tech: Python, scikit-learn, pandas, NLTK, scipy

SMART PEN — IoT + ML Project (Decembre 2025)

- github.com/serinenadabenmissi-design/smart-pen-.git
- Designed and built smart pen hardware using ESP32 microcontroller
- Integrated MPU6050 accelerometer and gyroscope for motion sensing
- Collected and processed sensor data manually, extracted 10 motion features (speed, vibration, pause ratio, smoothness, gyro metrics, jerk, energy)
- Trained scikit-learn classifier for handwriting quality scoring (perfect / medium / bad)
- Tech: ESP32, Arduino (C/C++), Python, scikit-learn, hardware design
-

EDUCATION:

Bachelor's Degree in Computer Science (Bac+3) | 2023 – 2026
University of Constantine 2, Constantine, Algeria

CERTIFICATIONS

- Robotics & Arduino — Akron Academy, 2024
- AI & Machine Learning — SoCode, 2025

SKILLS:

- Specialized Python, Django, Deep Learning, Machine Learning
- Proficient React, JavaScript (ES6+), HTML5, CSS3, Algorithms
- Experienced Node.js, Vue.js, Express.js, PHP, MySQL, Git
- Languages French (fluent), English (B2)
